Operating Supplies & Replacement Parts For Kwik-Way and other Brands

KWIK-WAY®

DYNAMIC 8 Alignment System

8-Toe CCD, Bluetooth™ & Encoder Runout Technology

- Bluetooth™ wireless transmission provides unsurpassed communications **without cables, antennas or mirrors**
- On-Sensor Function Control with Liquid Crystal, multi-function display **permits operation of alignment from any wheel position** and also features front toe, rear toe and camber LED indicators
- Kwik-Clamp, Patented 3-Point, Self-Centering, Zero Runout, No-mar wheel clamps with tire grabber arms - **for all wheels, especially expensive powdercoated and alloy wheels**
- Kwik-Toe & Spoiler program guarantees a **straight steering wheel on every alignment**
- Dynamic Alignment Sensors are equipped with internal optical encoders **assuring the fastest and most accurate alignment readings**
- Digital video camera for easy, **one-person positioning of vehicle on alignment rack**
- Latest U.S. vehicle specifications with international data included for operating in **34 languages; continuous vehicle specification updates, shim and technical updates for 16 months**

Wheel Grabbers shown on tire.

Kwik-Clamp: Patented 3-Point, Self-Centering No-Mar Wheel Clamps. Set of 4 Clamps - STANDARD with Dynamic 8 Recommended Package.

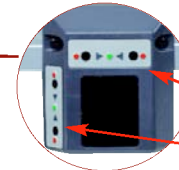

LCD Multi-Function display permits operating the alignment program from any wheel location

Total On-Vehicle Operation

NO need for cumbersome, expensive portable remote indicators!

On-sensor LED indicators for easy view of toe and camber angles

ALADIN 6 IR/Cable Alignment System: 6-Toe CCD, IR and Cable

- On-Sensor Function Controls permit operating the alignment program from any wheel position and features front toe LED indicators - **eliminating the need for cumbersome, expensive portable remote indicators**
- Clear, visible graphics and **many of the features of a more expensive model**
- IR communication between rear and front sensors - just 2 cables from front sensors to cabinet
- Kwik-Toe & Spoiler program guarantees a **straight steering wheel on every alignment**
- 4-Point wheel clamps
- Latest U.S. vehicle specifications with international data included for operating in **34 languages; continuous vehicle specification updates, shim and technical updates for up to 16 months**

4-Point Self-Centering Wheel Clamps. Set of 4 - STANDARD with ALADIN 6 IR/Cable Recommended Package.

Kwik-Way Alignment Packages include cabinet, computer with keyboard and mouse, printer, monitor, software and sensors

OR

Alternate Package for Customizing:

Dynamic 8 select from 3 wheel clamps **596-0001-00**

Aladin 6 IR/Cable select from 3 wheel clamps **590-0001-00**

(Wheel Clamps are required with alternate package and sold separately)

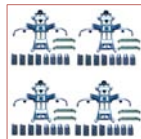

(Turning radius plates are recommended with any new alignment purchase and are sold separately with any alignment package - see below)

Alternate Package Items for Customizing your Kwik-Way Aligner

Choice of Wheel Clamps (Required): Select one of the three listed

Kwik-Clamp, Patented 3-Point Self-Centering Wheel Clamps (10-26" Range) - Fastest set-up and most suitable for mounting expensive alloy and powdercoated wheels. **594-4400-04 (set of 4)** Standard on Dynamic 8 recommended Packages

DELUXE 4-Point Self-Centering Wheel Clamps: (for wheel diameter 10-26") - for most standard and aftermarket wheels: **592-4050-04 (set of 4)**

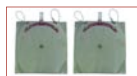

4-Point Self-Centering Wheel Clamps: (wheel diameter 10-20") - uses metal fingers and no grabber arms to clamp to the wheel making them suitable for steel wheels (extra care should be taken when using these clamps on alloy or powdercoated wheels): **590-4000-04 (set of 4)** Standard on Aladin 6 IR/Cable Recommended Pkg.

Choice of Turning Radius Plates (Suggested for use on all new aligners - select One)

Rust-Resistant, Coated Turning Radius Plates; 2,200 lb capacity. **590-1700-00**

Stainless Steel Turning Radius Plates; 2,200 lb capacity. **590-9992-70**

Electronic Turning Radius Plates; 20° turning radius; 2,200 lb capacity. **590-1830-00**
